PROJECTS

KinKeeper (April 2026)

Developed a friend-tracking web application using Next.js, featuring custom navigation bars and dynamic error pages.

- Built highly reusable and modular React components.
- Implemented modern routing and responsive layout structures using Tailwind CSS.
- Integrated dynamic icons and user interface elements with react-icons.

SkillSphere (April 2026)

Designed and developed an educational platform interface featuring dynamic course cards and intuitive navigation.

- Created responsive UI layouts for course listings and student dashboards.
- Formulated clean component architecture to support educational content and learning paths.

My Digi Tools (March 2026)

Created a storefront project for digital software tools with a data-driven approach.

- Developed a dynamic, JSON-based product grid to showcase digital tools.
- Styled the platform using Tailwind CSS and DaisyUI for a polished, modern, and accessible design.
- Deployed the project successfully using Netlify.

Payoo (February 2026)

Built a digital wallet and transaction-handling application utilizing vanilla JavaScript.

- Implemented core transaction logic for deposits, withdrawals, and balance tracking.
- Designed a clean, intuitive, and responsive interface for financial tracking.
