

Farabi Ahmed

Front-End Web Developer

Dhaka, Bangladesh | +8801570203520

farabiahmed2005@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Career Objective

Passionate Front-End Developer committed to creating seamless, problem-solving web experiences using modern technologies. Seeking to leverage my skills in a collaborative environment to drive innovation and project success.

Skills:

Languages: JavaScript (ES6+)

Front-End: Next.js, React.js, Tailwind CSS, HTML5, CSS3, Framer Motion.

Back-End: Node.js, Express.js, JWT, CORS,

Database: MongoDB.

Tools: Git, GitHub, Netlify, Vercel.

PROJECTS:

1. Study Nook -

[Live Link](#) | [Client Repo](#) | [Server Repo](#)

Features:

- **Conflict-Free Booking System:** Automatically detects overlapping time slots to prevent double-booking of any study room.
- **Secure Authentication:** Utilizes JSON Web Tokens (JWT) stored safely in HTTP-only cookies to protect user sessions and private routes.
- **Dynamic Search & Filtering:** Instantly search for rooms by name or filter down by specific amenities and pricing to find the perfect focus space.

Technology: Next.js, React, Framer Motion, Node.js, Express, MongoDB, Better-Auth, JSON Web Tokens

2. Digi Tools -

[Live Link](#) | [Client Repo](#)

Features:

- **Dynamic Product Management:** Products are loaded from a structured JSON dataset, featuring automated categorization with specialized tags like "Popular" or "Best Seller."
- **Real-time Cart System:** An interactive cart that updates the Navbar count instantly. Users can add items, remove specific products, and "Proceed to Checkout" to clear the cart with a single click.
- **Intuitive UI Toggling:** A centralized navigation system that allows users to switch seamlessly between the Product Gallery and the Cart view without page reloads.

Technology: React.js, Tailwind CSS, Daisy UI, Font Awesome, Json API, Netlify

3. Keen Keeper -

[Live Link](#) | [Client Repo](#)

Features:

- **Interactive Relationship Dashboard:** View your entire social circle at a glance with high-level statistics, including "Total Friends," "On Track" connections, and those who "Need Attention" based on your recent activity.
- **Smart Interaction Timeline:** A detailed, filterable history of every communication. Features a custom dropdown filter that allows you to instantly toggle between Calls, Texts, and Video interactions to see how you are spending your time.

Technology: Next.js, React, Tailwind CSS, Daisy UI, Context API, Recharts, React-Toastify,
